Managing Drivers

Managing a few drivers without proper tracking can quickly lead to disorganization, delays, and inefficiency. Without visibility, its hard to stay on top of operations.

These inefficiencies can increase operational costs, compliance risks, and issues with driver management.

Our Solution –

VOR7 Lite

VOR7 Lite is a purpose-built solution for companies that require dependable, real-time tracking of vehicles and their assigned drivers. Designed for simplicity and speed, it provides immediate oversight without unnecessary complexity.

It is ideal for operations where the focus is on knowing where vehicles are, who is operating them, and how they are being used—while also catering to large-scale fleet infrastructure.

VOR7 LITE

The Features

Key Capabilities

VOR7 Lite is equipped with essential tools to deliver operational clarity:

- Live GPS Tracking — Real-time location of every vehicle.
- Driver Assignment & Monitoring — Easily link drivers to vehicles for accurate tracking.
- Trip History Logging — Access detailed records of past movements.
- Reporting — Trip counts, Working hours, Trip distance, Maximum Speed, Battery Wattage, Fuel Level, Assign Tasks
- Geofencing — Receive notifications when vehicles enter or exit specified areas.
- Task Accomplishment - drivers can see their tasks and routes and check if they’re completed.

These features are streamlined into an intuitive dashboard accessible from desktop or the mobile application.

VOR7 LITE

The Features

Live GPS Tracking

Monitor all vehicle movements with live GPS updates. Whether you manage a single van or several field vehicles, VOR7 Lite provides accurate, real-time insights into location, speed, and route status.

Vehicle status shows when it is idle or shut down.

VOR7 LITE

The Features

Driver Management

Assign drivers to specific vehicles and maintain clear visibility over who is operating which vehicle at any given time. VOR7 Lite ensures every trip is correctly logged and associated with the right personnel.

Driver profiles make it easy to view trip histories, check assignments, and streamline accountability.

VOR7 LITE

The Features

Trip History

Each trip is automatically recorded and stored securely. View complete journey logs including start and stop points, time stamps, idle durations, and stopovers on the desktop or mobile application.

This feature supports performance audits, dispute resolution, and accurate reporting without manual paperwork.

VOR7 LITE

The Features

Geofencing and Alerts

Set geographic boundaries around key locations—such as depots, delivery zones, or service areas—and receive real-time alerts when vehicles enter or leave these zones.

Geofencing adds an extra layer of operational awareness and security.

VOR7 LITE

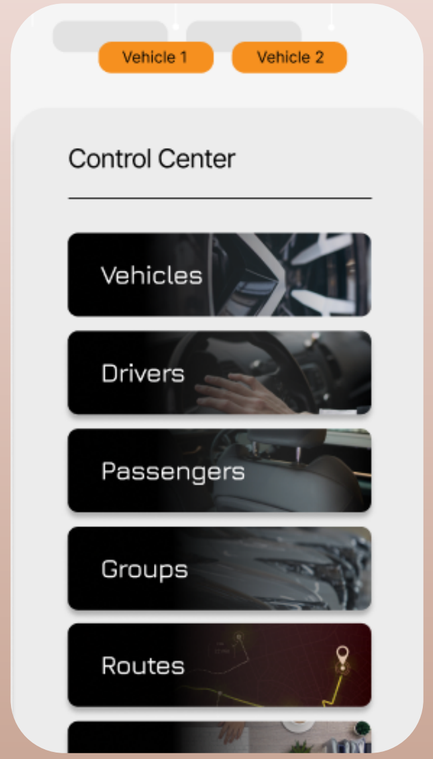

Practical Application

Mobile-Friendly Access

VOR7 Lite is fully optimized for mobile use. Access the platform from any browser to view your drivers and vehicles on the move.

There is no need for dedicated software or downloads—just log in through any browser.

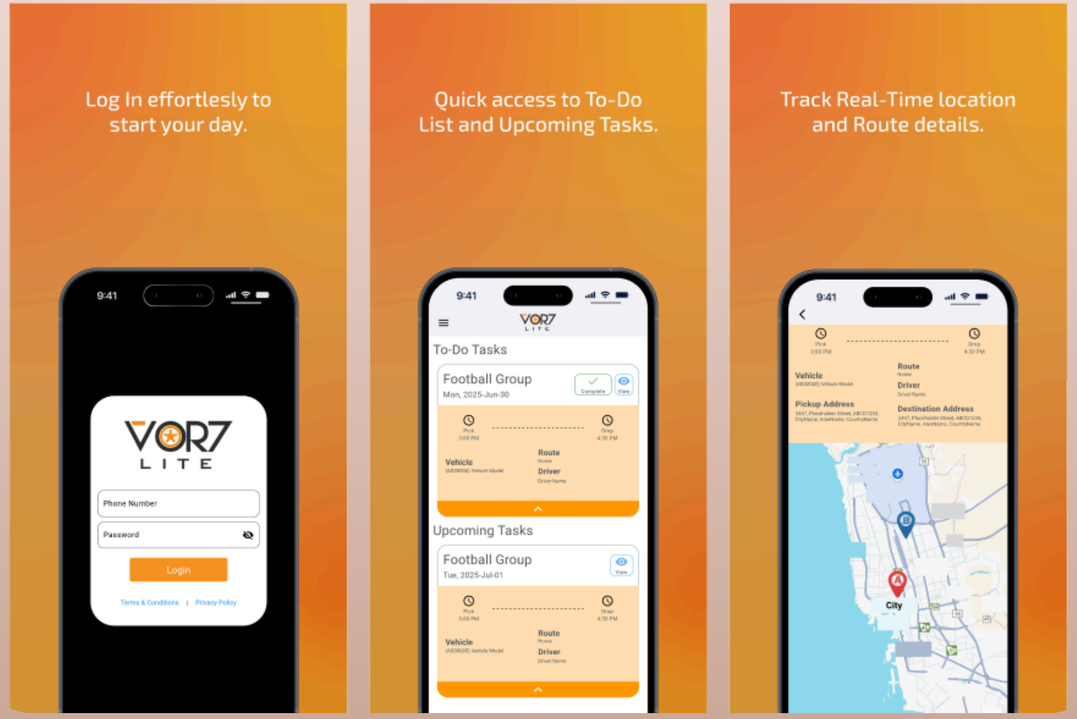

Practical Application

Use Case Scenarios

VOR7 Lite is trusted by businesses across multiple sectors where mobility and accountability matter:

- Field services and technical teams
- Equipment or vehicle rental firms
- Local delivery operators
- Property maintenance companies
- Contract-based operations with rotating drivers
- And more.

It is particularly suitable for organizations managing vehicles, where real-time tracking and driver oversight are essential.

Our Service

Flexible, Transparent Pricing

We offer clear, scalable pricing with no hidden fees.

- Subscription is based on number of vehicles tracked
- Includes all core features and driver tracking tools
- Support and system updates are included
- Volume-based discounts available upon request

Simple to start, easy to scale.

Our Service
